Damiano Lodi

Curriculum Vitae, November 2019

Personal Details

Birth	October 29, 1993 - Guastalla, RE, Italy
Address	Via A. Gramsci, 43 Suzzara, MN, Italy
Citizenship	Italy
Phone	+39 3429307356
Mail	damiano.lodi.93@gmail.com

Brief History

From 1993 to 2012 I lived in Suzzara (MN, Italy). In September of 2012, I moved to Trentino to enrol in the course of physics at the University of Trento.

On July 2016 I got my Bachelor Degree in Physics and in 2019 I graduated in Experimental Physics at the University of Trento with the highest possible grade.

Given my interest in business and technology applications, I decided to conduct my thesis research in a local startup, in which I am currently employed with the role of R&D designer.

Work

R&D Electrical Designer April 2019 - today
UpSens, Trento, Italy
`Roles:` data analysis, experiment design, PCB design

Currently, I am following 3 research projects (one in the role of Junior Project Manager) concerning the development of IoT devices to be applied in smart kitchen appliances and green buildings.

Internship for MS Thesis Research October 2018 - March 2019
UpSens, Trento, Italy

I studied the technical and economic feasibility of an innovative multi-sensor device to be used on smart kitchen appliances. The results of my work were positive and I am still following the product development in its last phase before production.

Education

MS in Experimental Physics (Nanophotonics) 2016 - 2019
University of Trento, Italy
Advised by Prof. Lorenzo Pavesi - Dr. Marco Facchini, 110/110 cum laude
`Title:` Study of a Multi-Sensors System for Kitchen Environment Monitoring

BS in Physics 2012 - 2016
University of Trento, Italy
Advised by Prof. Giovanni Garberoglio, 103/110
`Title:` Numerical Solution of Maxwell Equations for Periodic and Defected Photonic Crystals
`Url:` View the Thesis Online

Technical Skills

`Laboratory`	Analog and digital electronics, PCB design
	FPGA, vacuum systems, optics
`Softwares`	KiCad EDA, FreeCAD, Fusion 360, MATLAB, LaTeX
	COMSOL, LABVIEW, Mathematica
	Office 365, Wrike
`Programming`	Python, Git, C, Verilog
`OSs`	macOS, Unix/Linux, Windows
`Languages`	Italian (native)
	English (good working knowledge)

Workshops and Schools

TOP STARS 2018 July 16th - 25th, 2018
Innovation Challenge for PhD Students And Researchers
CLAB, TRENTO (ITALY)

This summer school offered me the unique opportunity to understand how to develop new business ideas combining technical knowledge, entrepreneurship experience and teamwork. I and my team tackled a real business problem validating our idea, refining our business model and presenting the solution in front of a jury of professors, industry representatives and potential investors.

IQP - Integrated Quantum Photonics 2017 March 26th - April 1st, 2017
9th Optoelectronics & Photonics Winter School
FOLGARIA (TRENTO, ITALY)

I was introduced to the latest advancement and technologies in photonics, covering topics like quantum optics, integrated quantum circuits, single-photon detectors and quantum computing.

Social Experience

During 2010-2011 I joined for two years a volunteer team of eighty entertainers for a group of about 400 kids. I spent one of these years as co-leader of the group. This experience has allowed me to improve my skill of organization and teamwork.

Moreover, I played the bassoon for 10 years, joining the orchestra of my city and various chamber music groups.
