Experience

2021 – Present **Project Manager**, *LEOS*, Rovereto (Italy).

I am following the production and development of the company's main product, single-frequency lasers. Being LEOS a small company, I am filling roles in both management and engineering.

- Project management
  - Creation of project requirements, specifications and time-frames.
  - Organization of team activities and tasks.
  - Exploration and testing of new product features (product management).
- System production
  - Production of all the mechanical and optical subsystems.
  - Assembly and testing of the laser head.

2020 – 2021 **R&D Engineer**, *LEOS*, Rovereto (Italy).

I followed the development of a new wavemeter capable of measuring a broad wavelength spectrum.

- Hardware review and debug of new PCB prototypes.
- Development of embedded algorithms for both MCUs and FPGAs.
- Data analysis and development of the new measurement algorithm (Python).

2019 – 2020 **R&D Engineer**, *UpSens*, Trento (Italy).

I followed the development of 3 research projects, one as Junior Project Manager.

- Hardware and firmware development for multiple IoT devices applied in smart-kitchen appliances.
- Hardware development for green buildings devices, including the usage of energy harvesting.

Education

2016 – 2019 **MS in Experimental Physics (Nanophotonics)**, *University of Trento.*

110/110 with honours
Thesis title: *Study of a Multi-Sensors System for Kitchen Environment Monitoring*
Supervisor: *Prof. Lorenzo Pavesi*
Industry Supervisor: *Ing. Alfredo Maglione*

2012 – 2016 **BS in Physics**, *University of Trento.*

Skills

Laboratory	Optics, analog and digital electronics, vacuum systems
Software/OS	KiCad, FreeCAD, Matlab, macOS, Linux, Windows
Development	Python, Embedded C/C++, Git, Verilog, Make, CMake, NodeJS
Management	Project management, strategic planning, time management

Languages

Italian	Mothertongue	
English	Advanced Working Knowledge	*Conversationally fluent*
